

# BLOOD TRANSPORTATION BAG

Designed for Transportation of Blood and Blood Components

BTB

## BIOSAFETY

Nobody can open for any reason, the blood components during the transportation thanks to its single use double-sided adhesive tape.

## TRANSPORTATION

BTB provides safety transport temperature range for short distances between blood centers and transfusion services thanks to its special three layered design.

## SPECIAL CONDITIONS

BTB is also suitable for:

- home transfusion.
- emergency transfusions outside of the hospital.
- cases where the pneumatic system is risky for rare valuable blood group and emergency transfusion.
